

July 28, 1982

Dear Mr. Weisberg;

Just a short note of appreciation for the hospitality both you and Mrs. Weisberg exhibited last weekend. Arrived home safe after a 21 hour drive. However, the directions that the state police gave us down route 81 were a great improvement, thanks for the suggestion.

One thing you mentioned caused me to think all the way back to Memphis, it related to the comment you made regarding the direction of the shots fired during the assassination. I believe you suggested that a shot might have come from the opposite grassy location than most critics cite as a possible source and from under the fenced area behind Zapruder etc. I could not think of any literature that has suggested these options. Knowing your vast insight and knowledge of this subject I believe you have specific reasons for suggesting these possible sights, if so could you direct me to the source(s) that lead you to these conclusions?

If you think of it and have the opportunity I would like to know whether or not there is the possibility of obtaining a copy of the Groden film from your professor friend at Hood College.

Sandy forgot to ask Mrs. W. for that chicken recipe that they were talking about. It would really brighten up her day if Mrs. W. could forward her one of her recipes. Her address is:

Sandy Davision
4511 n. Maple
N. Little Rock Ar. 72116

Thanks for the kindness and consideration.

Sincerely,

Bob Benn
7000 Ashaway
Memphis, Tn. 38119

Dear Bob,

8/17/82

Sorry about the delay in responding. I've been tied up in affidavits but, having gotten two off to my lawyer last night, I'm catching up on overdue correspondence first. As you may remember, I'm religious about doing the walking the doctors prescribed, and that takes almost all mornings.

Sandy should have gotten the recipes by now. I'll mailed them right away.

The college won't reproduce the Gordon/Groden film and from what I've heard of it, you can do better with a film the fellow Hawkins in Canada sells. Ask him and see. I think he is called Collector's Archive. My friend at the college said it wasn't worth the cost.

There is too much we don't know about the mechanics of the crime because they, too, were never investigated. But for some of the period of the shooting the south knoll was directly ahead, and that is consistent with the neck wound being of entrance.

With regard to the possibility of a shot under the picket fence, I have some rather provocative pix. They show that the fence was patches, that it appears a door or gate in it was eliminated, and right where there is a sewer inlet, there is concrete that appears to have been added. That inlet is 30" square, grate top, and if a shot was from there, an ideal place to drop the weapon or for a person to hide.

We enjoyed your visit. I'll likes Sandy very much. She is partial to straightforward women.

Our best,
